

HiMStim Presents CERN

By acclaimed filmmaker **Nikolaus Geyrhalter**
(*HOMO SAPIENS, OUR DAILY BREAD, ABENDLAND*)

Multi-award winning director Nikolaus Geyrhalter delivers stunning images from inside the immense Large Hadron Collider, the world's largest laboratory for particle physics, operated by world-renowned research organization CERN (European Organization for Nuclear Research). Featuring interviews with the leading experts who operate and maintain this gigantic Big Bang machine, the film provides fascinating insights into not only this complex experimental research institution, but the quirky geniuses behind the scenes.

"That's fantastic - it's a good feeling when you come home in the evening because you know more than in the morning. The feeling of having thought of something nobody has done before is what's really exciting about research. For a few moments you are the only person on earth who has a clear understanding of a problem." - Christophe Grojean, CERN
